

# Buy Local

We all feel a sense of pride when we buy something made local, but the benefits of buying local go far beyond a feeling. Keeping money circulating in our own community instead of bleeding it out has dramatic effects on the way we live. When we buy local we start a chain reaction of local spending which in turn provides more local opportunities for us. Local businesses also tend to have great pride in their products. Whether it's the farmer growing corn or the woodworker building a custom kitchen, when we are selling to our neighbors the extra effort is always placed.

We at NH Woodworks have a great sense of the New Hampshire pride and do our best to express it through craftsmanship and dedication to our customers. Please think of us for your next wood furniture, cabinetry, and millwork purchase.

Thank you,

Andy Sutherland

CUSTOM WOODWORKING

**HANDCRAFTED CABINETRY,  
FURNITURE, AND MILLWORK  
DESIGNED AND BUILT FOR  
YOUR NEEDS**

## CABINETRY

When it comes to homes nothing says quality like custom cabinetry. In your

kitchen every inch counts, so why limit yourself to modular boxes that waste space and use sub standard materials such as particle board and filler strips. Custom cabinetry can

make almost any space into usable space with far fewer seams between boxes and no limits to sizes or style.

Furniture inspired cabinetry is a great way to add character to a space without sacrificing functionality.

NH Woodworks designs and builds our cabinets to the highest standards. Our lumber is hand picked, our boxes are 3/4" plywood, our finishes are eco-friendly, and we offer all the latest hardware and accessories for your cabinets. NH Woodworks strives to exceed our customers expectations not only in our quality, but also in our dependability and our ability to deliver on time.

## FURNITURE

Quality wood furniture should last generations. NH Woodworks combines traditional joinery with state of the art machinery with a result that should impress any shaker. With very few exceptions, if you see it, we can make it. Just send us a picture or a sketch with some measurements, and we'll build it.

## MILLWORK

When building a new house or renovating a room, it's the details that are the difference between average and exceptional. NH Woodworks custom builds and installs products such as doors, fireplace mantels, columns, wainscotings, and specialty moldings just to name a few.

## CARPENTRY

Having a finish carpenter with a cabinet shop is very beneficial to a contractor building a custom home or a home owner with specific needs.

Whether we are hanging doors, running moldings, or installing complex railings, NH Woodworks' experience and attention to detail is evident.
